

Palace Lighting is now serving Davis Park!

Palace Lighting is an established business that has been serving the south shore of Long Island for 20 years. Our company has facilitated a wide variety of tasks ranging from large commercial projects to the simplest of residential service calls in an area spanning Babylon to Montauk.

Our most recent projects have taken us to Shelter Island, Easthampton and the communities of Seaview and Point of Woods on Fire Island. In the fall of 2007, Palace Lighting was commissioned and entrusted with the inspection of all buildings at Point of Woods which is comprised of 132 private residences as well as 32 Association owned buildings.

This inspection process was custom tailored for beach houses wherein we carried out a preventive maintenance check for worn or broken devices, all outlets, smoke detectors and fire extinguishers. We also provide a more detailed overview of the property by examining condition of the wiring under the structure as well as the meter and main breakers that can be prone to corrosion.

If the outlets and fixtures in your home have not been updated in the last 20 years or if your "Handy Man" work has been done by your Uncle or nephew; it may be a good idea to have Palace Lighting do a thorough inspection of your home. We will provide you with a written statement of safety recommendations.

The cost of inspection and written report is \$125.00. The reassurance that a Master Electrician has thoroughly checked out your home, Priceless! Contact us for an appointment. Homes inspected will get a 10% discount on any repairs over \$400.00.
